

GARRETT-KEYSER-BUTLER CSD

iPad Chargers Issued to Students

Garrett-Keyser-Butler CSD will use the model outlined below for iPad chargers/cords issued to students:

- Students will be issued a charger/cord with their iPad only **one time**.
- This charger/cord is for duration the school district has this iPad (4-years)
- Chargers/cords will **not** be collected at end of each school year, students will reuse the following year
- If a student loses/damages any part of charger, they must go to store and replace...no longer available for purchase from the GKB Tech Dept.
- If a student has a charger not working properly, they should take it to Tech Dept to be inspected
 - Upon inspection:
 - If the charger is deemed to be faulty, the Tech Dept will provide a replacement.
 - If the charger is deemed to be physical damage caused to the charger/cord, parents/guardians will need to provide a replacement
- New students to the district and each year's Kindergarten will be issued chargers/cords from the Tech Dept.
- **iPads should be charged with a minimum of a 12W charging block**
 - **iPads should not be charged with an iPhone charging block (5W)**
- Replacement charger/cord needs to be Apple MFi (made for iPhone, iPad, and iPod) certified charging and syncing cable for your Apple devices to ensure proper/safe charging.
