- Cover letter and resumé building

Alaska EXCEL provides activities for Jr. High/High School students in 7 rural school districts from the Lower Yukon and Kuskokwim region. Alaska EXCEL offers approximately 500 student opportunities per year. The program is open to students grades 7 through 12+ (up to age 21). The session/intensives range from 4 to 30 days, depending on the training provided, and the age/grade level of the participant.

As a District Partner, The Lower Kuskokwim School District sends students to Excel sessions that students have applied and been accepted to. There is NO cost to students or families.

Excel Alaska is a great way to participate in a CTE course or life skills preparation not available in your school.
